**January** 1, 19, 20, 21

Please enter through the Member Entrance. For the health and safety of our animals, some exhibits may not be available until the Aquarium opens to the general public.

---

### Online Exclusive

**How do we transport scalloped hammerhead sharks? Very carefully!**

As always, our goal is to move animals as quickly and easily as possible. But it’s never that simple — and we take extra care with scalloped hammerheads because of the unique profile of their heads.

Transporting these sharks from our offsite Animal Research and Care Center to the Aquarium this summer took hours of planning and a big team. They talked through each step so everyone understood their roles and could move swiftly and steadily once the action began.

**View the fall 2018 issue of Shorelines online at MontereyBayAquarium.org/Members/Shorelines** for an exclusive photo essay about the scalloped hammerhead transport, narrated by Ann Greening, senior aquarist and our elasmobranch team leader.
